

THE PROFILE VAULT

471 organic health profiles, mapped end to end

Six platforms, every account already running. You get median views, the product being promoted, the funnel type, where the link starts, where it actually ends, and the route in between. Start from what works instead of from a blank page.

471 profiles	6 platforms	311 with a live funnel	309 full routes traced
-----------------	----------------	---------------------------	---------------------------

Where they are

The same playbook runs on six platforms. Facebook and Instagram carry the volume, but the smaller platforms are where the competition thins out.

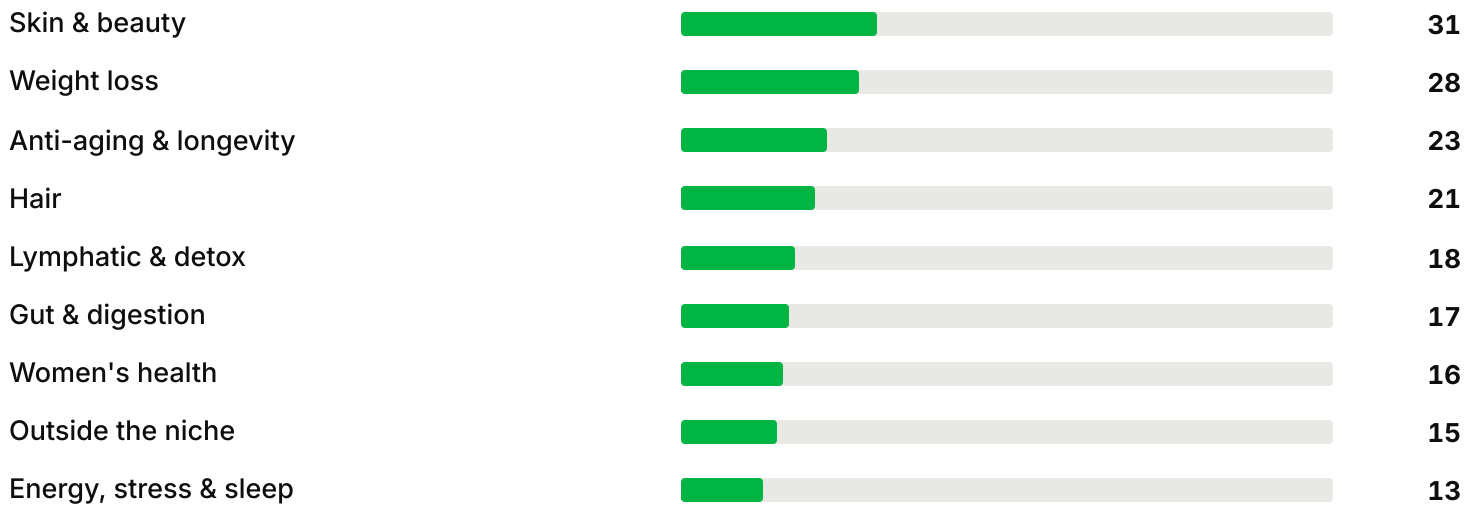

Facebook		200
Instagram		153
YouTube		41
TikTok		37
Pinterest		27
Snapchat		13

Profiles per platform.

What they sell

Twelve niches carry almost everything. Natural remedies alone is a quarter of the set.

Natural remedies		103
General health		81
Nutrition & recipes		37

Profiles per niche, top 12 of 20.

READ THIS FIRST

What the data says

One product beats a catalog

273 of 471

promote a single product. The pattern is not a store. It is one problem, one answer, repeated.

Supplements are the category

210 profiles

promote a supplement. Not courses, not coaching. A physical bottle somebody reorders.

Most have no funnel at all

143 profiles

publish with nothing to click. They build reach and leave the money on the table. That gap is your opening.

Few run a real funnel

94 profiles

run an advertorial, a VSL, a quiz or their own store. Everyone else is pointing at a marketplace listing and hoping.
